

$OA = L$ αποσταση φωτονιων στο S
 $OB = L'$ αποσταση φωτονιων στο S'

γραφικος τροπος

$$\left. \begin{aligned} x_B &= \frac{1}{u} t_B \\ x_B &= t_B + L \end{aligned} \right\} \begin{aligned} t_B &= \frac{Lu}{1-u} \\ x_B &= \frac{L}{1-u} \end{aligned}$$

λυνω ως προς x_B, t_B

αρα

$$x_{B'} = \gamma \left(\frac{L}{1-u} - u \frac{Lu}{1-u} \right) = \gamma \frac{L}{1-u} (1-u^2) = \gamma L(1+u) = \sqrt{\frac{1+u}{1-u}} L$$

$$t_{B'} = \gamma \left(t_B - u x_B \right) = \gamma \left(\frac{Lu}{1-u} - \frac{uL}{1-u} \right) = 0$$
